TITLE : PAD AND ITS ATTACHING METHOD

ABSTRACT : PROBLEM TO BE SOLVED: To provide a pad capable of decreasing the fraying of mainly a sportswear and absorbing external shock.

SOLUTION: A hot-melt adhesive sheet having a shape nearly equal to that of a pad and larger than the outer circumference of the pad is pasted on the back face of a pad member composed at least of a front cloth and a shock-absorbing member. Preferably, a heat-resistant releasing paper having the shape nearly equal to the hot-melt adhesive sheet is pasted on the surface of the hot-melt adhesive sheet.
